

Firefly

The efficient design of the Firefly was designed to feel much larger than it really is. The living room, including a convenient kitchen has a vaulted ceiling which allows plenty of light coming in through the transom windows. Relax on the front porch where the vaulted ceiling continues. Space for a stack washer and dryer, a walk-in closet in the bedroom and the 48" fiberglass shower provide everything you need for comfortable weekend living or full-time residency.

The square footage and other dimensions on our floor plans are approximate. Renderings are not intended to be an accurate representation of the home and are often shown with optional features and/or third-party additions that can be added at additional cost if available in your region or situation.
